

GET INVOLVED!

# Join an APWA Committee

Committees have regular meetings,  
presentations, and newsletters

---

*Contact the committee chair to engage with your APWA colleagues in topics that interest you. Committees give access to in-depth networking and career growth.*

Scan the code  
to access the  
committee list

*Find more details under the Committee tab on the APWA-WA Website: <http://washington.apwa.net/>*

## Asset Management

The Asset Management Committee will prepare you to meet new challenges with a series of webinars and in-person workshops on the latest tools, business processes and emerging technologies.

## Diversity, Equity, and Inclusion

We stand as a catalyst for change by developing educational opportunities to foster understanding, awareness, and involvement.

## Emerging Professionals (EP)

Geared towards members and non-members who are starting out in their career and want to grow professionally. We provide events focused on career development and opportunities to network.

## Government Affairs Committee (GAC)

Provides resources to our APWA membership regarding local, state, and national rules and legislation that affect public works. Work with partners such as the Association of Washington Cities and Washington State Association of Counties to influence state legislation that impacts Public Works.

## Hydraulics & Drainage Structures

We are a diverse group of professionals, consultants, and drainage product manufacturers that get together to discuss new products, current construction issues, and drainage related specifications.

## Marketing & Public Works Outreach

We work in conjunction with other APWA-WA chapter committees and partner with other Washington associations to increase membership and participation in APWA-WA, boost public awareness of public works, and encourage public works careers.

## Mentorship

This committee facilitates the development and implementation of a mentorship program for the APWA Washington Chapter!

## Stormwater Management

We bring together a wide range of stormwater practitioners to share information on the latest research, innovative projects and regulatory developments that impact and direct our members' work.

## Technology

To identify, educate, and promote technology to deliver Public Works faster, better and more cost-effectively, in support of people, agencies, and organizations that plan, build, maintain and improve our communities.

## PreFOG and Wastewater

Our committee allows pretreatment and wastewater professionals a platform to network, share ideas, and troubleshoot areas of concern, with an emphasis on FOG. We also have presentations featuring new technology and equipment to help us perform our jobs.

## Construction

There are several construction committees including: Construction Management, Construction Administration Education (CAEC), Construction Standards, Division 1, and Construction Materials. Depending on the committee, they conduct workshops, write specifications and advocate for best practices.

## Emergency Management

Our committee's purpose is to increase the readiness of public works professionals through emergency awareness, resource availability and continued training.

## Environment & Sustainability/Biophilic Design

Promote the concept of sustainability and provide public agencies and their consultants with information needed to develop and achieve sustainability goals.

## History

We strive to make Washington State history come alive through conference presentations, Committee Spotlight blogs and PUBLICWorks Magazine articles. We focus on public works infrastructure in our presentations.

## Management & Public Administration (MPAC)

MPAC creates a space that brings public works and industry leaders together to discuss current trends and topics in the public works management and civil engineering arenas.

## Membership

Membership committee is a liaison between new members and the APWA committees. We also assist with recruiting and maintaining memberships and membership tools.

## Operations & Maintenance/ROADEO

To facilitate the inter-agency networking and cooperation enhance and improve the day operations for local, regional and national emergency response.

## Student Outreach Network

We help connect young people with opportunities to pursue careers in public works through student chapters, networking with public works professionals, supporting senior capstone projects and internships.

## Transportation

Share knowledge by being the premiere conduit for technical sessions, advocate for legislation, policies, and practices that will lead to transportation systems that are more effective, efficient, and environmentally sustainable.
